Concept of the	Voices from the Arctic Climate change has long
exhibition:	been deeply anchored in our consciousness and
	the consequences can even be seen in the Alps.
	They are, however, more extreme in the Arctic,
	where the inhabitants are partially still dependent
	on hunting and where balance with nature is crucial. In the exhibition «Voices from the Arctic»,
	these people speak - in their language. Human
	impact is questioned - for the benefit of future
	generations. Here, as well as, there.
	The exhibition is a cooperation between the
	Museums Cerny.contemporary circumpolar art
Live-Stream	and West Baffin Eskimo Cooperative.
